# PERSPECTIVE: X-RAY AND CT INSPECTION SERVICES

## Peace of mind starts here.

Our flexible service solutions are designed to keep pace with growing demands and complexity across industry. With a variety of in-house inspection services combining radiography expertise with access to powerful state-of-the-art X-ray and CT inspection technology, we're revolutionizing the non-destructive Testing (NDT) service experience to help you achieve more.

### **X-ray and CT for any application**

Get the most reliable inspections for plastics and composites, metals, additive parts and 3D measurements, ceramics, electronics, batteries, CAD comparisons, and more. With our technology, you can improve quality assurance, increase ROI, reduce scrap, and better control project costs.

### **Customer training**

Advance your inspection knowledge at every level with our certified RT instructors, from advanced techniques for image quality and protocol improvement developed for high productivity and output gains, to radiography and CT fundamentals, to system operation.

### **Inspections by the hour, scan, or project**

Access the latest premium X-ray and CT inspection technology on-demand at our worldwide Customer Solutions Center (CSC) locations with flexible, cost-effective CT scans, 3D analysis and metrology. We are available whether you need to inspect a single sample part or a large volume batch to meet production line output demands.

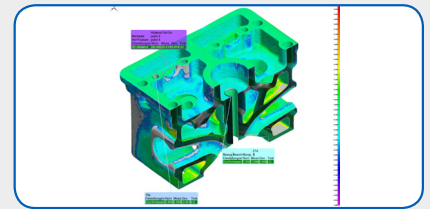

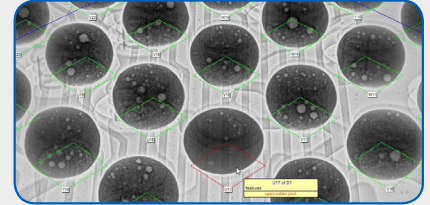

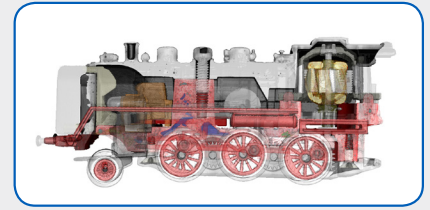

### **Consultative services**

Collaborate with our onsite NDT experts to design tailored radiography solutions and workflows for your unique applications, new materials, and other inspection challenges.

# Advancing NDT everywhere.

Experience our phoenix|x-ray Perspective inspection services offering the latest BHGE technology available at our convenient locations around the world. Our experts are ready to assist where and when you need them to exceed even the highest expectations.

- Ensure the safety, quality, integrity, and consistency of parts and products
- Enable production improvements in all industry and academic fields
- Accelerate research and development processes
- Inspection Services locations available in China, Asia, North America and Europe
