Performance Specifications

There are two grades of performance specification: Improved and Premium

Accuracy
Combined effects of non-linearity, hysteresis and repeatability:
Improved: ±0.1% FS BSL
Premium: ±0.04% FS BSL

Note: For the barometric pressure range, accuracy is of span, not full scale.

Note: Accuracy is specified for each direction separately for bi-directional ranges.

Zero Offset and Span Setting
Demountable electrical connector allows access to potentiometers that give at least ±5% FS adjustment (DIN connector, Demountable Depth Cable only)

Factory set to:
DIN Connector ±0.2% FS
Depth Cable ±1.0% FS
Demountable Depth Cable ±0.2% FS

Long Term Stability
±0.05% FS typical (±0.1% FS maximum) per year increasing pro-rata for pressure ranges below 350 mbar

Temperature Effects
-10 to +50 °C (14 to +122 °F): ±0.5% FS
Temperature error band (TEB)
-20 to +80 °C (-4 to 176 °F): ±1.0% FS TEB
-40 to +80 °C (-40 to 176 °F): ±1.5% FS TEB

Temperature effects increase pro-rata for pressure ranges below 350 mbar and are doubled for barometric ranges.

Line Pressure Effects (Differential Version Only)
Zero shift: <±0.03% span/bar of line pressure
Span shift: <±0.03% span/bar of line pressure
Effects increase pro-rata for differential pressure ranges below 700 mbar (10 psi).
